                                                                                                                                                                                                                                                                                                                                                                                                                              Gaps
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            Sequence 2, Application US/09764904;
Sequence 2, Application US/09764904;
Patent No. US20020173454A1
GENERAL INFORMATION:
APPLICANT: Rosen et al.
TITLE OP INVENTION: Nucleic Acids, Proteins, and Antibodies
FILE REFERENCE: PA122
CURRENT FILING DATE: 2001-01-17
Prior application data removed - consult PALM or file wrapper
NUMBER OF SEQ ID NOS: 137
SOFTWARE: PatentIn Ver. 2.0
SEQ ID NO 2
LENGTH: 5
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               .
                                                                                                                                                                                                                                                                                                                                                                                                                           ..

APPLICANT: Barney, S.
APPLICANT: Guthrie, K.
APPLICANT: Menutka, G.
APPLICANT: Anner, M.
APPLICANT: Lambert, D.
TITLE OF INVENTION: HYBRID POLYPEPTIDES WITH ENHANCED PHARMACOKINETIC PROPERTIES
GENERAL INFORMATION:
APPLICANT: Genencor International, Inc.
TITLE OF INVENTION: Novel EGIII-Like Enzymes, DNA Encoding
TITLE OF INVENTION: Novel EGIII-Like Enzymes, DNA Encoding
TITLE OF INVENTION: Such Enzymes and Methods for Producing Such Enzymes
FILE REFERENCE: GCS16-2-PCT
CURRENT APPLICATION NUMBER: US/09/284,327
CURRENT PILING DATE: 1999-04-10
NUMBER OF SEQ ID NOS: 41
